PhysicsKIT Website and Portal

PhysicsKIT website

In the PhysicsKIT4STEM website (<https://physicskit4stem.eu/>) you can find the latest project outputs, like the PhysicsKIT Educational Backpack and the PhysicsKIT Club.

PhysicsKIT Educational Backpack

The purpose of this output is to develop the Physics curriculum and the PhysicsKIT (with its dedicated assembly and configuration guide) which will complement and support the curriculum and engage learners from the start.

The PhysicsKIT Club

This output has two clear intentions:

- deliver the PhysicsKIT curriculum, assembly guide and all material and resources under a learning motivation environment
- develop a handbook for the educators, with instructions on how to use the PhysicsKIT and its curriculum, complemented by lesson plans.

The PhysicsKIT Portal

This output promotes a learning motivational environment (LME) which will engage the users (teachers/pupils) in the learning process, offering an enhanced experience through motivational workflows and gamification mechanisms. You can find it in the link: <https://learning.physicskit4stem.eu/>.
